ABSTRACTED-PUB-NO: BE 727716A

BASIC-ABSTRACT: The interlayer consists of a non-woven fabric, the upper and lower layers of which slide in relation to one another.

The outer surface is denser, and one surface presents a large no. of tiny PVC suction-discs.

No folds are formed when rugs are placed on other piled carpets using these interlayers. Danger from folds and slipping is prevented, and the rugs lie evenly and firmly.

TITLE-TERMS:
NON SLIP INTERLAYER CARPET
